

Canadian Services for Obsessive Compulsive Disorder
Updated April 2018

The following Canadian clinicians or treatment centers have indicated to The Canadian Institute for Obsessive Compulsive Disorders (CIOCD) that they treat individuals with Obsessive Compulsive Disorder (OCD). These are listed in alphabetical order by Canadian Province and by name of clinician or treatment center. This information is not necessarily a complete listing of available services in any province or region. Please be advised that this is a listing solely of treatment providers who have indicated that they treat OCD and have agreed that their names appear on this referral list. The CIOCD has not investigated these treatment providers and does not have the facilities to evaluate their competence in treating OCD at this time. This listing is provided for informational purposes and does not constitute CIOCD endorsement or recommendation of the clinicians or centers identified. It is recommended that you discuss individual treatment options with your own health care professional.

ALBERTA

Calgary

Dr. BELSHER, Gayle

Outpatient Mental Health Program, Sheldon Chumir Health Centre
Alberta Health Services, Phone (403) 955-6473

Our clinic does assessment and treatment of OCD and OCD spectrum disorders for adults (ages 18 to 65). We have several Ph.D. psychologists who practice CBT, and we have an OCD group. Treatment is covered by Alberta Health Services so there is no cost. Referrals must be made by a physician, and are screened through a Mental Health Central Access office before arriving at our clinic. Wait list times vary from about 3 to 6 months, depending on therapist availability and vacancies in the group that has a limited capacity because we actually do the behavior therapy in vivo with the patients.

Contact information: Gayle Belsher, Ph.D., R.Psych (contact info above)

Program: Outpatient Mental Health at Sheldon Chumir Centre

Please note: referrals cannot be made directly to Dr. Belsher or their OCD group without first being screened by Central Access in Calgary - phone 943-1500 - who will forward them to us if they are appropriate.

Dr. DOBSON, Deborah

We provide services in the Outpatient Mental Health Program (address below) for adult clients (ages 16-65) with anxiety disorders, including OCD. Services include individual CBT. There is an ERP group available as well (run by Dr. Gayle Belsher, who is a psychologist in our program). Unfortunately, wait times are approximately 6-9 months. Services are provided through the public health care system, so are covered under provincial medical coverage.

Deborah Dobson, Ph.D., R.Psych., Outpatient Mental Health Program
Sheldon Chumir Health Centre, 6th Floor, 1213 - 4th Street S.W., Calgary, T2R 0X7
Ph: [403-955-6475](tel:403-955-6475); Fax: [403-955-6688](tel:403-955-6688)

BRITISH COLUMBIA

New Westminster

Dr. ERICSON, David

In the Fraser Health Authority (FHA) of British Columbia, most neighbourhood mental health centres will provide CBT and/or pharmacotherapy for OCD. Since FHA has a catchment area of 1.6 million residents, the best starting point is the website: <http://www.fraserhealth.ca>.

I also see adult OCD clients in my private practice in New Westminster, BC; the address is Suite 304--250 Keary Street, New Westminster. I see a broad range of clients with anxiety, depression or psychosis. The location is convenient for people who live in Vancouver's eastern suburbs, including New West, Burnaby, Coquitlam, Port Moody and Port Coquitlam. The usual wait for new patients is about two weeks: either they, or a referring clinician, can contact me directly at (604)520-4663.

Vancouver

The UBC Psychology Clinic is a university Clinic welcoming referrals from across the lower mainland of BC. Fees range from \$20-60/session. Psychology students within UBC's Clinical Psychology program offer specialized CBT for OCD for adults and young children up to age 12. For adults, groups for OCD are also offered in addition to individual treatment. The Clinic is open throughout the calendar year, and referrals are especially welcome from July to October. All therapists are supervised by licensed, registered psychologists. Address is 2136 West Mall, Vancouver, BC, V6T 1Z4. Website www.clinic.psych.ubc.ca Contact person is either UBC Psychology Director Dr. Söchitng or Clinical Assistant Armin Sohrevardi. Phone is 604-822-3005

Fax is 604-822-6923. Dr. Ingrid Söchting also treats OCD in her private clinic at UBC. For referrals, call 604-822-1958.

Dr. MILLER, Lynn

The name and contact information of the professional or center (address, phone, e-mail or fax), the age groups treated (children, adolescents, adults), the services provided, and the approximate waiting period for assessment and treatment are listed below. CBT for Kids, 1037 W. Broadway, Suite #101

Vancouver & Victoria

Dr. OCHS, Eric

The Anxiety Clinic at Victoria Mental Health Center, British Columbia, offers group-based CBT for OCD for adults. It is for VIHA residents (Vancouver Island basically, but in practice clients from Victoria). Treatment is covered by MSP and the waitlist is between two to six weeks depending on overall referral volumes to the clinic. I run the OCD group with a PhD graduate student and Dr. Cliff Duncalf (psychiatrist). Clients are all evaluated by Dr. Duncalf or another VIHA psychiatrist before being admitted to the Anxiety Clinic Programs.

Referral to the program is via Mental Health Intake, which can be accessed via GP referral, or VIHA psychiatrist referral.

Oromocto

Dr. ROGERS, Wendy

The CF has a network of multidisciplinary mental health clinics across the country. Our clinic at CFB Gagetown has three psychiatrists and four psychologists who treat clients with OCD. The services are available only to military personnel, through the military health services, so our clinic may not be suitable for your list.

N.B. If you are expecting a reply and don't hear within a day, please call. Our system experiences intermittent network connection problems.

GENEST, Sharon

The most effective way for you to get the information would be to access our web site at www.gmpsiologists.com, where we have complete bios and CV's for all our people. We have eight psychologists, all of whom address your needs, all experts in CBT and the treatment of OCD, all highly experienced, doctoral psychologists. We treat adults and adolescents and families but do not directly provide services for children under 14.

Services can be requested directly from our web site or by emailing info@gmpsiologists or calling us at 492-2546 or faxing a referral to 423-3469. Dr. Myles Genest, Dr. Richard MacGillivray, Dr. Connie Wanlin, Dr. Marc Woods, Dr. Simon Sherry, Dr. Heather MacLatchy (Adolescent specialist).

Dr. LAPOSA, Judith

Anxiety Disorders Clinic, Centre for Addiction and Mental Health, Toronto ONT, 416-535-8501 x6819, ages 18-65, medication consultations, group CBT.

Dr. MANASSIS, Katharina

Our group, the Anxiety Disorders Program at the Hospital for Sick Children, University of Toronto, sees children and adolescents with OCD ages 5 to 16 from the Toronto area. We operate by physician referral, which must be sent to our intake coordinator, Ms. Veronica Romano (veronica.romano@sickkids.ca tel: 416-813-6582). All cases receive a thorough diagnostic assessment and decisions about treatment are made at that time. Depending upon the situation, these can include CBT, medication, and/or consultation to a community health provider. The waitlist

for assessment is approximately 6 months, but if treatment occurs at our centre there is a further wait period for that.

Dr. RAVINDRAN, Lakshmi

The Anxiety Disorders Clinic, Mood and Anxiety Program, CAMH provides assessment and treatment of individuals with OCD from ages 18-65. We operate by physician referral. All cases receive a thorough diagnostic assessment from a staff psychiatrist and decisions about treatment are made at that time. Depending upon the situation, these can include CBT, medication, and/or consultation to a community health provider.

Currently, our wait time for a psychiatric assessment is approximately 8 weeks.

To receive outpatient CBT treatment targeting OCD, the current wait-time is approximately 3-4 months following the psychiatric assessment.

Periodically, we also offer an 8-week education and support group for family members of individuals with OCD. The group aims to provide support and information for family members given the unique challenges they face in supporting individuals with OCD. Topics reviewed include: psychoeducation about the illness, stress management, communication strategies, and crisis and problem management. I believe that within the CAMH, we also assess children with anxiety disorders, including OCD, through the child, youth and family program

Dr. RICHTER, Peggy

Director, Clinic for OCD & Related Disorders
Sunnybrook Health Sciences Centre
Department of Psychiatry, 2075 Bayview Ave.
Toronto, ON., Canada, M4N3M5

Dr. SOOKMAN, Debbie, Director, **The Canadian Treatment Center for Obsessive Compulsive Disorders** (CTCOCD, [www. ctcocc.ca](http://www.ctcocc.ca)), 4115 Sherbrooke Street West, Suite 430 Westmount, QC H3Z 1K9, Canada, Phone: (514) 710-7063, e-mail Drdsookman@ctcocc.ca. By appointment

The Canadian Treatment Center for Obsessive Compulsive Disorders (CTCOCD) is the national specialized treatment center responsible for provision of specialty services on request for OCD and related disorders throughout the lifespan to Canadians from all provinces and regions, as well as to international residents. The CTCOCD offers specialty consultations, assessments, and specialized cognitive behavior therapy to individuals suffering from OCD and/or related disorders through the entire lifespan (children, adolescents, adults). Patients are accepted for specialized treatment regardless of severity of symptoms ranging from very mild and newly developed to very severe and longstanding. Treatment options include brief specialty interventions for mild symptoms, and therapist-assistance, home visits, and/or intensive treatment programs as needed for severe symptoms for local and out of town patients. Psychiatric consultation and pharmacotherapy are available. Consultation and training to professionals are available. Wait time for consultation or assessment is within three weeks following referral. Wait time for

treatment is generally less than six weeks following referral. Patients may call for further information and for an appointment. Referrals should be addressed to Dr. Debbie Sookman, Director, CTCOCD: Drdsookman@ctcocd.ca
4115 Sherbrooke Street West, Suite 430

SASKATCHEWAN

Regina

Dr. HADJISTAVROPOULOS, Heather

PhD students in the Clinical Psychology Program, working in the Psychology Training Clinic see clients with OCD under my supervision. I do not see clients directly myself.

Heather Hadjistavropoulos, Ph.D., R. D. Psych
Department of Psychology, University of Regina
Regina, SK. S4S 0A2

Dr. HADJISTAVROPOULOS, Thomas

I treat OCD (persons 17 years or older) with CBT in my private practice. I usually accept new cases every fall and do not tend to take on new cases in the spring or summer.

Thomas Hadjistavropoulos, Ph.D., ABPP, FCAHS
Director, Centre on Aging and Health
